

IoT Solutions

Presentation by NeuralArc Global Team

Our Mission

At NeuralArc Global, our mission is to **enable smart monitoring** through connected devices. We strive to enhance efficiency and accuracy across industries, delivering innovative IoT solutions that empower businesses and communities to thrive in a digital age.

Our Core Services: Automation, Software, Training

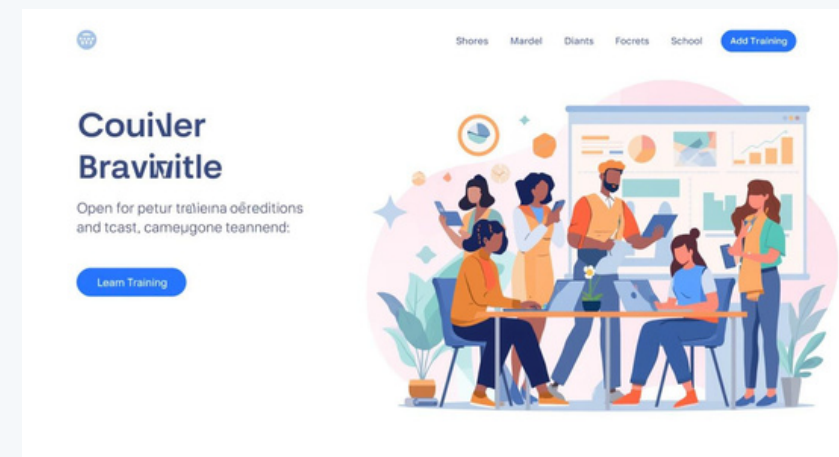

IoT-Based Automation

Streamlining processes through intelligent device integration.

Customized Software

Tailored applications designed for diverse industry needs.

Industry Training

Empowering students with essential technology skills.

Focus Sectors for NeuralArc Global

Smart Farming

Automate irrigation and monitor plant health using IoT-based devices.

Hospitals & Labs

Improving patient care with real-time data access.

Blood Banks

Ensuring safe blood storage with advanced monitoring.

Variety of Applications

Connecting industries to improve efficiency and outcomes.

Future Plans

Integrating AI and Expanding Industries

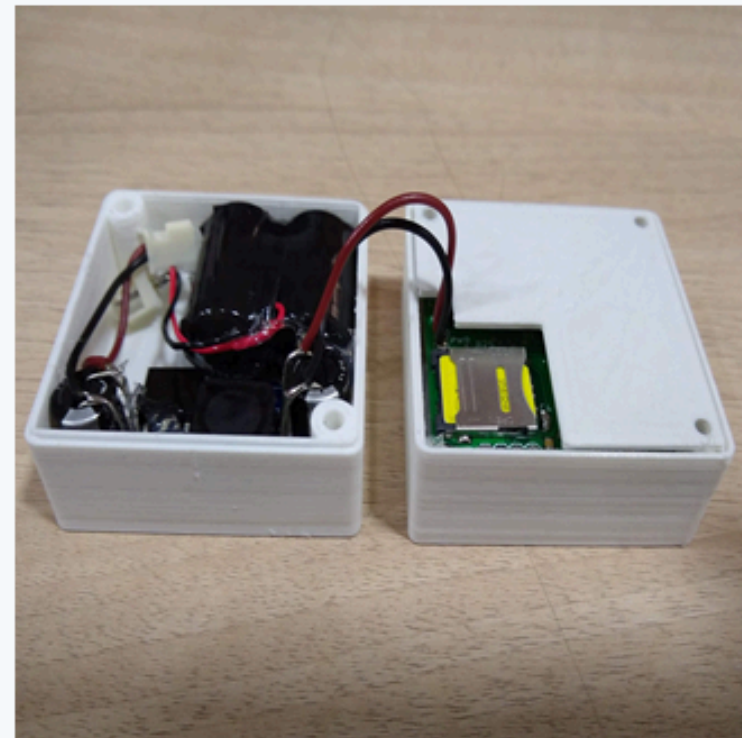

AI Analytics

We aim to **integrate AI analytics** into our IoT solutions, enhancing data insights and predictive capabilities, thus empowering clients to make informed decisions for their operations.

Industry Expansion

Our goal is to **expand** our services to additional industries, broadening our impact and application of IoT solutions, ensuring smart monitoring reaches diverse sectors across India.

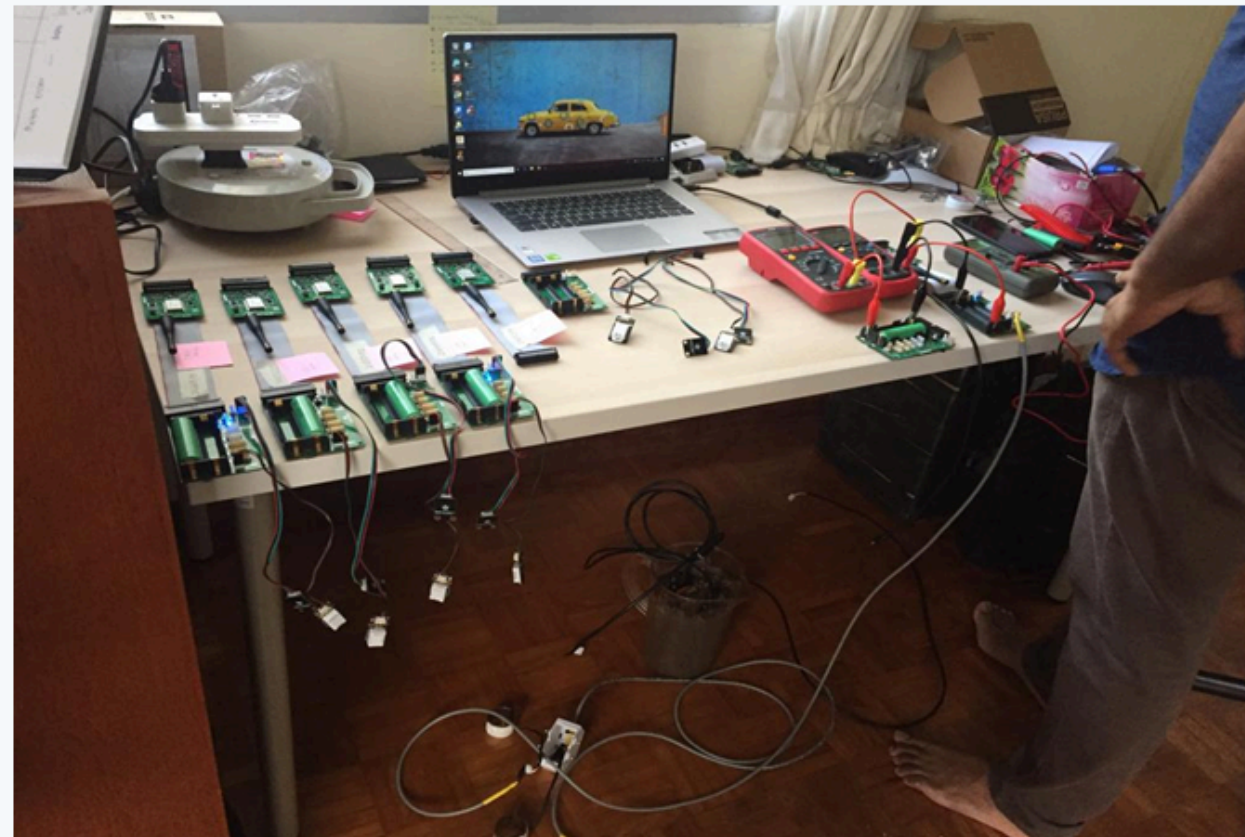

Product Portfolio

Smart Agriculture Network

Tie-Up With Multiple EMS Companies

- MightyNet – **Taiwan**
- 3D –Technologies PVT. LTD
- **Bangalore**
- Vasantha Advanced Systems
- **Coimbatore**

Field Trial

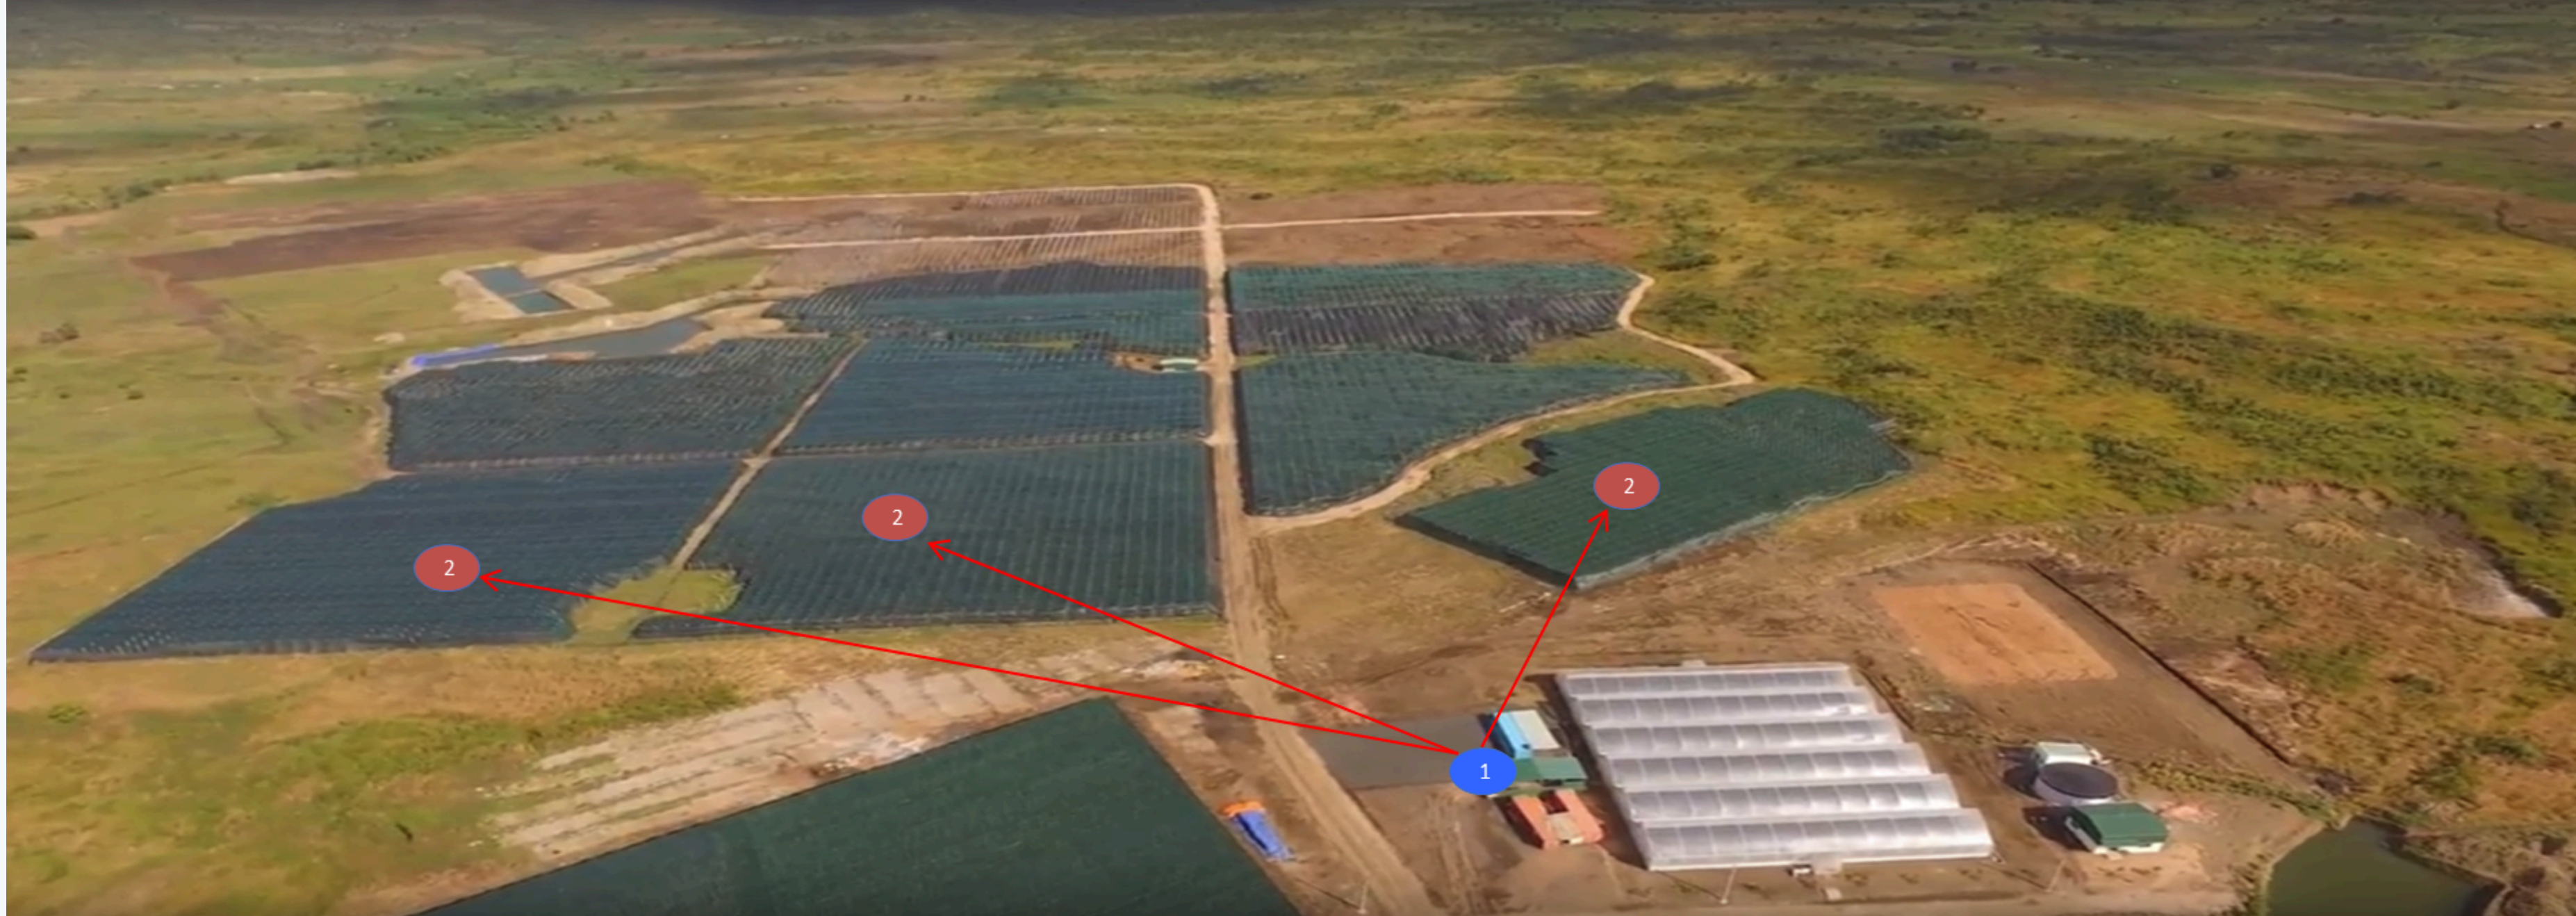

Olive Plant in Spain

Cannabis Plantation at Colorado, USA

Pepper Plantation in Vietnam

Olam Pepper Plantation - Vietnam

- The blue forty-foot container (FFC) near the blue dot is where DAD located.
 - There are two greenhouse nurseries (another one just below the one in picture – same size)
 - Plantation extends 3.2km N and 2km E from FCC.
 - We ran an external antenna on top of the FCC.
- Plots (red dots) are .7 – 1.4 Ha Currently 150+ plots planted
 - Ultimately will have 300+ DCDs in place for final deployment
 - Poles extend 3.4m from soil surface.

DCD -Data Collection Device

Daily Plant Breathing Pattern

🚀 Introducing Almora – Revolutionizing Automotive Diagnostics! 🚀
🌟 From guesswork to confidence – Almora puts diagnostics in your hands 🌟
Made with passion by Western Ghats in collaboration with NeuralArc, ...more

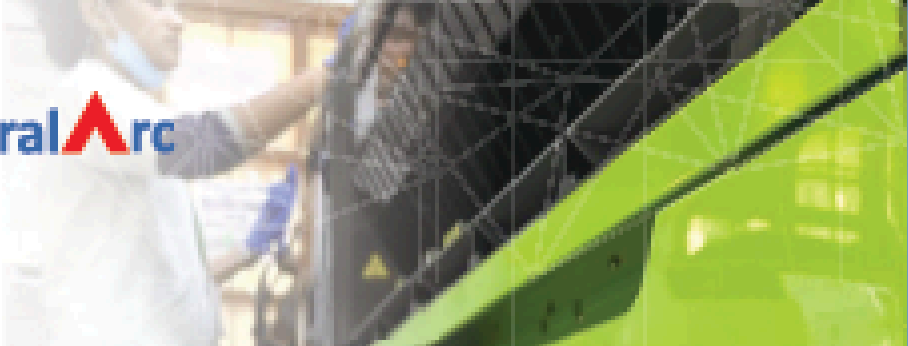

WHAT IS ALMORA?

- AUTOMOTIVE DATA BUS MONITOR
- WORKS WITH CAN BUS
- INDICATES VEHICLE SECURITY STATUS
- HAS ACTIVATION TEST MODE
- ALSO PROVIDES TECHNICAL DIAGRAMS
- FULL SUPPORT FOR TEST BENCH SCENARIOS

Internship Program

This Device Running OverAll India

T-Remo Tracker

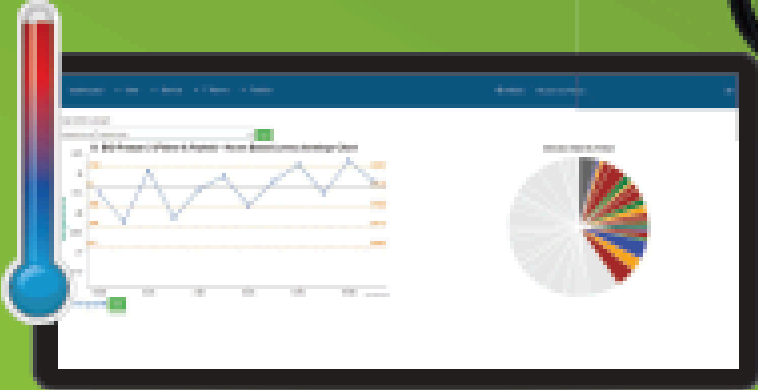

Temperature Monitoring Device

Web Portal

- Admin control
- Device onboarding
- Report generation and display
- Alert messages and logs

Basic Function

- Continues Temperature measurement
- Secured Data Transfer to cloud server
- LED Device status indication

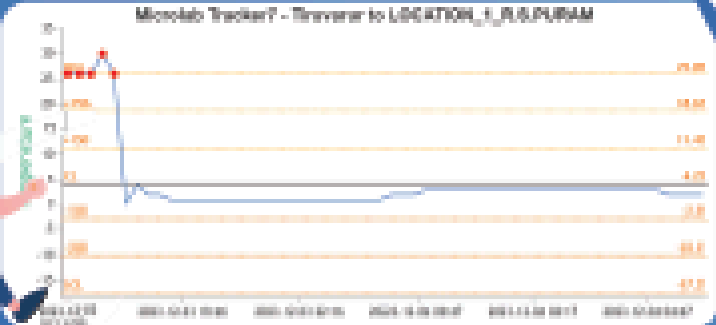

Tracker Device

Web Portal

- Admin control
- Device onboarding
- Report generation and display
- Alert messages and logs

Basic Function

- Continues Temperature measurement and aggregation
- Secured Data Transfer to cloud server
- GPS location tracking (Optional)
- Periodic message transfer (Optional)
- LED Device status indication
